

## A B S T R A C T

## A DOSE INDICATOR FOR A FLUID DISPENSER DEVICE

5           A dose indicator (A) for a fluid dispenser device  
          (B), said indicator being characterized in that it  
          comprises a rotary counting wheel (10) that is  
          displaceable in rotation, and a slide member (20) that is  
10       displaceable in translation, said counting wheel  
          including indicator means (15), indicating the number of  
          doses dispensed or the number of doses still to be  
          dispensed, and co-operating with a display opening (25)  
          provided in said slide member (20), said rotary counting  
15       wheel (10) including a hollow profile (18) co-operating  
          with a projection (28) of said slide member (20), the  
          shape of said hollow profile (18) being such that at  
          least some rotations of said rotary counting wheel (10)  
          cause said slide member (20) to be displaced in  
          translation, thereby modifying the position of said slide  
20       member (20) relative to said counting wheel (10).
